

Rotaract Club Platform

Complete User Guide

For Administrators, Members & Prospective Members

SERVICE ABOVE SELF

Covers the public website, the member portal, and the admin portal — roles & access, the membership pathway, and event attendance.

Contents

1. Platform Overview
2. Roles & Access Control

6. Guide for Administrators
7. Event Attendance & QR Check-in
8. Membership Requirements & Promotion
9. Troubleshooting & FAQ

1. Platform Overview

The platform has three parts:

Area	Who	What
Public Website	Everyone (no login)	Home, About, Events, Projects, News, Gallery, Avenues of Service, Sponsors, FAQ, Contact, and the membership Join form.
Member Portal /member	Members & Prospective Members	Dashboard (with QR check-in), profile, events, attendance, announcements, member directory, resources.
Admin Portal /admin	Admins & Super Admins	Full management of people, programs, content, media, attendance, analytics, users & roles, audit log.

After login you're routed automatically: admins → Admin Portal; members & prospective members → Member Portal.

2. Roles & Access Control

Each user holds one or more **roles**, ranked by privilege (lower number = more access). Effective access follows the user's highest role.

Lvl	Role	Access
0	Super Admin	Everything, incl. managing other admins and deleting users.
1	Admin	Full Admin Portal + Member Portal.
2	Board Member (+ legacy: President, Secretary...)	Member Portal + elevated rights on some content.
3	Member	Full Member Portal; listed in the directory.
4	Prospective Member	Member Portal (dashboard, profile, events, attendance, announcements, directory, resources). Not yet in the directory; sees their membership progress.
5	Normal / Public	Public website only.

Access matrix

Capability	Public	Prospective	Member	Board	Admin	Super
Public website	✓	✓	✓	✓	✓	✓
Member portal + QR check-in	—	✓	✓	✓	✓	✓
Membership progress card	—	✓	—	—	—	—
Listed in directory	—	—	✓	✓	✓	✓
Admin portal	—	—	—	—	✓	✓
Mark attendance / set requirements / promote	—	—	—	—	✓	✓
Manage admins / delete users	—	—	—	—	part	✓

Access is enforced at three layers that share one definition: middleware (route guard), server layout guards, and database row-level security. An admin can never assign a role higher than their own; only a Super Admin creates Super Admins.

3. Getting Started

Create an account

1. Go to </signup> (or click **Join / Sign Up**).
2. Enter name, email, password → submit.
3. You're signed in as a **prospective member** and taken to the Member Portal.

Log in / reset password

Log in at </login> ; use **Forgot password** to receive a reset link. Invited by an admin? Click **Accept Invitation** in the email to set a password and activate your account.

4. Guide for Prospective Members

You get the Member Portal while your membership is being earned/approved:

- **Dashboard** — a **QR check-in** card, announcements, upcoming events, and your **membership progress** (turns green as you meet each requirement).
- **My Profile** — photo, occupation, contact details.
- **My Events** — upcoming club events.
- **Attendance** — check in at events (camera QR or code).
- **Announcements, Directory, Resources.**

Attend the required events (see §8). When you've met all requirements your card turns green and an admin promotes you to full **Member** — at which point you also appear in the directory.

5. Guide for Members

Dashboard

QR check-in card, current announcements, upcoming events, quick stats.

Check in to an event

On the dashboard (or the Attendance page) tap **Scan QR** and point at the event's QR code, or type the event code. Done instantly.

My Profile

Update details/avatar; toggle directory visibility.

My Events

Upcoming events with date, time, location.

Announcements / Directory / Resources

Read club announcements; browse and search fellow members; download shared documents (public or member-only).

6. Guide for Administrators

The Admin Portal ([/admin](#)) groups tools in the left sidebar. Most follow the same pattern: a list with **Add** / **Edit** / **Delete** and a dialog form.

People

Members

The roster. **Add** sends an email invite. **Approve** a prospect to make them a Member. Edit roles. Delete users.

Applications

Public Join-form submissions. **Approve** invites & onboards them as a Member (with email); **Reject** with notes.

Attendance

Mark Attendance — pick an event, tick who attended (members & prospects). **By Person** — everyone's attendance; prospects show requirement progress + a green **Ready** badge and a **Promote** button. **Requirements** — set how many of each event type a prospect must attend.

Board Members & Committees

Board roster with positions; committees with a chair.

Program

Events & Event Types

Create events with an image, date/time, location, capacity, status, and an **event type**. Each event has a **QR button** to generate its attendance code. Event Types are managed separately — six core types (Project, Fellowship, Professional Development, Club Meeting, Club Assembly, Board Meeting) are **locked** and cannot be deleted.

Projects

Service projects. Creating a project also creates a linked **Project-type** event so it's attendable and counts toward requirements.

News & Announcements

Blog posts (publish toggle); member announcements (priority, expiry, publish).

Media & Resources

Gallery

Albums + multi-image upload.

Resources

Documents with access level (public / member-only / board-only).

FAQs

Q&A with category, order, visibility → shown on the public FAQ page.

Sponsors

The sponsoring Rotary club(s) shown on the public Sponsors page.

Content

Site Settings (name, tagline, hero banner, logo, meeting info, social, footer, contact) · **Rotary Highlights** · **Legal Pages**.

Insights & System

Analytics (live counts) · **Users & Roles** (change any user's role) · **Audit Log**.

7. Event Attendance & QR Check-in

Admin — generate the code

1. [Admin → Events](#) → click the **QR button** on an event.
2. A unique code (24-hour expiry) is created and linked to that event; a scannable QR + text code appears.
3. Display the QR (or code) at the venue. Generating a new code deactivates the old one.

Member / Prospective — check in

1. On the **Dashboard** (or [Member → Attendance](#)) tap **Scan QR** and point at the code — or type it in the box.
2. Attendance is recorded against that event instantly.

Ended events are closed. If an event has finished (status completed/cancelled, or past its end), check-in is refused. Camera scanning uses the browser's built-in reader; manual entry always works as a fallback.

Admin — manual adjustments

[Admin → Attendance → Mark Attendance](#) : pick the event and tick anyone present or absent.

8. Membership Requirements & Promotion

A prospective member becomes a full member by participating. Requirements are **configurable per event type**.

Set the requirements (admin)

[Admin](#) → [Attendance](#) → [Requirements](#) : for each event type (Club Meeting, Fellowship, Project, etc.) set how many a prospect must attend, plus an optional "project lead roles" count. Set 0 to ignore a type.

How progress is tracked

- Every event has an **event type**. A prospect's attendance is grouped by type and compared to the requirements.
- Prospects see this on their **dashboard**; admins see it under **Attendance** → **By Person**.
- When all requirements are met → a green **"All requirements met"** / **"Ready"** indicator.

Promotion

An admin clicks **Promote** (on Attendance → By Person, or Approve on Members/Applications). This grants the **Member** role, creates the member record, and adds them to the directory.

9. Troubleshooting & FAQ

A prospect can't see the portal

Confirm they're signed in with the `prospective_member` role (Admin → Users & Roles). Prospects are allowed into the portal by design.

"This event has ended" on check-in

Expected — attendance closes when the event finishes. Admins can still set attendance manually under Attendance → Mark.

An attendance code doesn't work

Codes expire after 24h and only one is active per event. Generate a fresh one from the event's QR button.

I approved someone but they're not a member

Use **Promote** (Attendance → By Person) or **Approve** (Members). That assigns the Member role and creates the record server-side.

An admin save "doesn't stick"

Ensure the database migrations (through 022) are applied — they add the admin write policies for sponsors, attendance, FAQs, and requirements.

Images not showing on the live site

Storage buckets are public and serve correctly; if images don't render it's usually a stale deployment — redeploy the site.
